DETAILED ACTION

Terminal Disclaimer

1. The terminal disclaimer filed on 4/21/04 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of US Application No. 09/339,190, now US Patent No.6,757,476 has been reviewed and is accepted. The terminal disclaimer has been recorded.

Response to Arguments

2. Applicant's arguments filed 11/22/06 have been fully considered but they are not persuasive.

Applicant argues that the examiner in rejecting claims 1-3 under 35 U.S.C. 101 fails to analyze the claims before concluding that the claims are non-functional descriptive material on a recording medium.

In response, examiner refers the applicant to claim 1, for example, which cites "A **recording medium** with respect to which data is transferred by a recording/reproducing apparatus, the **recording medium** comprising ... ", then the claim further goes on to cite different types of "**information**" recorded on the recording medium, which includes, for example, "... at least one still picture group **information** used by the apparatus for arranging ..."; "... at least one additional audio group **information** used by the apparatus for arranging ..." . The "**information**" as recited in

Art Unit: 2621

claim 1 is a signal. And signals are intangible, which makes the claim non-statutory since this lacks any practical application within the recording medium per se that produces a useful, tangible and concrete result. That the "information" is "used for" performing a function simply satisfies an "intended use" clause. And, "intended use" in this case requires an external device to be actualized (see ANNEX IV of 35 U.S.C. 101 Interim Guideline of 3/2/06).

Claim Rejections - 35 USC § 101

3. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

4. Claims 1-3 are rejected under 35 U.S.C. 101 because the claims are non-functional descriptive material recorded on recording medium, and therefore nonstatutory. "Nonfunctional descriptive material" includes but not limited to music, literary works and a compilation or mere arrangement of data. When nonfunctional descriptive material is recorded on some computer-readable medium, in a computer or an electromagnetic carrier signal, it is not statutory since no requisite functionality is present to satisfy the practical application requirement.

Claim 1, for example, cites "A **recording medium** with respect to which data is transferred by a recording/reproducing apparatus, the **recording medium** comprising ...", then the claim further goes on to cite different types of "**information**" recorded on the recording medium, which includes, for example, "... at least one still picture group **information** used by the apparatus for arranging ..."; "... at least one additional audio

group **information** used by the apparatus for arranging ...". The "**information**" as recited in claim 1 is a signal. And signals are intangible, which makes the claim non-statutory since this lacks any practical application within the recording medium per se that produces a useful, tangible and concrete result. That the "information" is "used for" performing a function simply satisfies an intended use clause. And, "intended use" in this case requires an external device to be actualized. Merely claiming nonfunctional descriptive material, i.e., abstract ideas, stored in a computer-readable medium, in a computer, on an electromagnetic carrier signal does not make the claim statutory. (see ANNEX IV of 35 U.S.C 101 Interim Guideline of 3/2/06).
